**Tr8star  
Modular  
Trade  
Software**

The sensible alternative software for  
Trade Operation Solution requirements

## CAUSING A MAJOR PARADIGM SHIFT IN THE BANK, CORPORATE AND FINTECH TRADE OPERATIONS SOFTWARE DOMAIN

### New but proven technology, created by experts for experts:

- Designed and implemented the Bank Payment Obligation tooling at a major Bank
- Designed and implemented a digital trade transaction solution at a global Fintech
- Designed and implementing a full end-2-end Trade operations environment at a major Bank

### Tr8star modular software

Developed on the basis of considerable practical experience; our Tr8star software has a modular structure. Tr8star's canonical model renders it readily exchangeable with other applications.

This enabled us to have built an application that is specifically pre-configured to meet most requirements out of the box whilst still allowing easy configuration to meet any specific product needs you might have

### Contemporary and future proof technology

- Non legacy, flexible updatable and future proof infrastructure
  - Benefitting of decades of business, processing and technical expertise
  - Design allows for any type of (Bank) transaction flow to be configured
  - Trade Digitization enabled to allow for future e-presentations
  - Plug and play with transparently priced optional services
- 

## Plug and play

- Fully functional traditional trade product suite handling (Standby) Letters of Credit, (Direct) collections and Bank Guarantees
- Back-office transaction handling tooling with SWIFT connectivity ability
- Client trade portal solution with pre-configured back-office connectivity
- Configuration tooling to allow branding and self-tailoring of products
- Future proof (e-presentations, full integration, new products)
- Highly configurable with low or no code changes at all
- OPEX model (subscription only)
- On premise hosting enabled
- Quick time to market
- Intuitive UI and UX

## Optional services:

- (Gradual) integration to core infrastructure
- Interface design and support
- Cloud hosting services
- Configuration services
- Bespoke modules
- Consultancy
- And more

## Contact us to find out how we can make trade finance work for you too

Do you have an outdated (or no) trade operation solution landscape or maybe you are just dissatisfied with your as-is situation, and would you like to tackle this as quickly and easily as possible? We are always open to brainstorm and share experiences, so plan an informal call soonest by reaching out to us here at TradeWiz, it would be our pleasure to connect
